**BackupEDGE 02.03.00 Build 3**

We're pleased to announce that **BackupEDGE 02.03.00** is now available for download. Media kits are also available for order.

**BackupEDGE 2.3** introduces **cloud storage** backups, treating the **Amazon Web Services S3** storage service as a normal storage *Resource*, with support for:

- Full or partial backups of servers or parts of servers with dual data integrity checking (bit-level + full file checksum).
- **Instant File Restore™**, providing access to individual files and folders in seconds. Only the archive blocks containing the actual data you want to restore need to be transmitted across the network link.
- Full compatibility with **RecoverEDGE** bare metal disaster recovery.
- No caching of entire backups on the local hard drive. Only a small (10MB) segment of your backup gets cached at any one time.
- Compression and encryption support.

From single server to managed replicated sites, backups to Amazon **S3** provide reliable and inexpensive managed off-site storage through a well-known technology leader.

## Amazon S3 Pricing

Pricing starts at a very reasonable **\$30 / month**, and is billed directly by **Amazon Payments**. This includes:

- 25GB of on-line storage
- 40GB of uploads per month
- 40GB of downloads per month

If you exceed these amounts, small per-GB fees are charged:

- \$.25 (yes, that's really 25 cents) per GB stored after the first 25GB per month.
- \$.20 per GB uploaded after the first 40GB per month.
- \$.20 per GB downloaded after the first 40GB per month.

Your base monthly fee also includes a **BackupEDGE Support Agreement** for one license.

Browse to our Web site today to learn more about using **BackupEDGE** with **S3**.

Remember to download the updated **BackupEDGE 2.3** Users Guide and other useful info from the [Documentation/Whitepapers](#) link.

## Fixes / Patches / New Platforms

Also included in **BackupEDGE 2.3**:

- vxfs filesystem labeling and improved network gateway support in the OpenServer 6 and UnixWare 7 versions of **RecoverEDGE**.
- improved disk by-id and UUID support in Linux releases.
- support of openSUSE 11.
- support for Mandriva 2009.
- updated **FTP Backup** support with improved debugging.
- Selectable .debug file usage.
- Added Ultrium 4 and DAT160 medium size detection.

## Update / Upgrade Policies

All users of **BackupEDGE 02.00.01** (which started shipping on August 15, 2003) or later may download and install the current 02.03.00 release as a free update, provided it is on the same platform.

In-stock unregistered 2.x licenses will still work. There is no need to exchange or rotate them. Simply download the new release.

Users of legacy 01.0x releases may purchase an inexpensive upgrade from their favorite channel partner.

Download by clicking [Downloads](#) from the **Microlite** home page, or from your bookmark if you created one after last registering for a download.

Our formal policy for updates and upgrades can be found on our web site. It is available as a direct link from our home page, or by browsing to:

[http://www.microlite.com/Downloads/Upgrade\\_Policies/upgrade\\_policies.html](http://www.microlite.com/Downloads/Upgrade_Policies/upgrade_policies.html)

I want to thank you all for your continued support of our products, and wish you happy holiday season and a very happy and prosperous new year.

Tom Podnar - President
